Loading Presets into
# Adobe Lightroom
gavin@photoeffects.biz

Make certain that you are in the develop module.
Circled RED above.

Then right-click, or Command-click, in the 'Presets'
panel on the right and select 'Import'. See below,

Navigate to where you downloaded my presets
onto your computer. Open the folder and
click on the first preset, and then shift-click on the last
preset to select them all.

Then click 'Import.'

They will appear in your 'presets.'
Thank you.
